DETAILED ACTION

1. Claims 1-25 are pending in the application.

Specification

2. This application does not contain an abstract of the disclosure as required by 37 CFR 1.72(b). An abstract on a separate sheet is required.

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-21 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Gaullier (U.S. Patent 6,242,603, cited on applicant's form 1449).

Gaullier discloses a process for preparing lysergic acid by isomerizing paspalic acid in the presence of metal hydroxide in an inert solvent such as water or an alcohol or their mixtures at a temperature between 20 degree C and 60 degree C (see col. 1, lines 43-49, example 2 and claims 1-14, specifically claims 7, 10 and 11). The process described by Gaullier clearly anticipates the instant claims.

4. Claims 22-25 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Sandoz (GB 988,001, cited on applicant's form 1449).

Sandoz discloses improvements in or relating to lysergic acid derivatives. On page 2, lines 76-82, Sandoz teaches that the aqueous solution containing crystalline lysergic acid may be evaporated to dryness and methanol poured over the dry residue to remove isolysergic acid. This process of removing isolysergic acid disclosed by Sandoz clearly anticipates the instant claims.
